EMPLOYMENT

Co-founder and CTO, Department of Better Technology 2013-04 — 2016-12

The Department of Better Technology helps governments deliver great digital services to the people who depend on them. I envisioned, architected, and developed Screendoor, our revolutionary application for digitizing paper-based workflows. Screendoor is a vital tool for dozens of government clients, spanning from small municipalities to US Federal agencies.

Presidential Innovation Fellow, The White House Office of Science and Technology Policy 2012-08 — 2013-04

I was selected as part of the inaugural class of Presidential Innovation Fellows, a "highly-competitive program that pairs talented, diverse technologists and innovators with top civil-servants and change-makers working at the highest levels of the federal government to tackle some of our nation's biggest challenges."

CTO, GovHub 2011-11 — 2012-08

I was the first tech hire at GovHub, a civic technology startup focused on connecting citizens with their local government leaders. At GovHub, I developed the first comprehensive geographic database of government representatives, from local to federal level.

Application Development Intern, Novartis 2011-09 — 2011-12

SERVICE

Classroom Teacher, ScriptEd 2014-09 — 2016-02

ScriptEd equips students in under-resourced schools with the fundamental coding skills and professional experiences that together create access to careers in technology. At ScriptEd, I developed and taught a programming curriculum for students in New York City public schools.
